## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Solomon.

Solomon teaches a method of extrusion coating a substantially rigid continuous substrate having a substantially uniform cross-sectional profile, where the substrate is preheated and then pushed through a coating die having an aperture substantially conforming to the cross-sectional profile of the substrate, wherein the coating material is applied to the substrate in the die (Figs. 2, 4; Col. 1, line 60-Col. 2, line 15; Col. 3, lines 24-28).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vogel, Levy, and Goeway et al. are cited as prior art of interest.

Vogel and Levy teach die coating methods where the substrate is preheated prior to coating in the die.

Goeway et al. teaches a die coating method where the substrate has an irregular cross-section.
